

*Does your carton flow look like this?*

**We have the solution!**

**More Efficiency**

**More Productivity**

**NO More Hang-Ups!**

**Spend more time picking orders!**

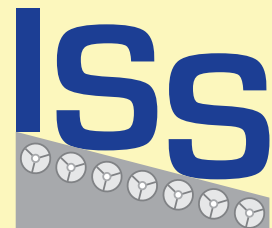

- ⊗ Re-slotting of inventory can occur more frequently since it does not require additional labor to re-profile.
- ⊗ Inventory slotted in the proper location leads to increased picking productivity.

**Please call for a free sample shelf**  
*and let us show you how our tracks out perform all others!*

# *Now There Is A New* **LOW PROFILE CARTON FLOW SYSTEM** *That Actually Works!*

Our new carton flow system is a "full bed of rollers" to flow virtually any type of product. The low-profile design allows tracks to lie inside your existing carton flow shelves and best of all, it is heavy-duty for more than twice the load capacity of standard carton flow tracks and is virtually maintenance free.

## **IS YOUR MERCHANDISE GETTING HUNG-UP?**

**Eliminate the need for pull or push rods!**

**ISS has the solution to retrofit your existing carton flow shelves.**

- ⊗ Tracks fit inside existing carton flow shelves with no loss of vertical clearance.
- ⊗ Provides twice the wheel coverage for virtually no hang-ups.
- ⊗ Superior tracking eliminates the need for full length dividers.
- ⊗ In most cases track capacity is 50 pounds per square foot.
- ⊗ Pick locations can be changed "on the fly" since labor is not required to re-profile lanes.
- ⊗ Installs in minutes with no tools.
